First Amendment to:

Classification and Correlation of the Soils
of
Decatur County, Indiana
August 1980

This amendment is to correct a symbol error on the soil survey atlas sheets in the Decatur County, Indiana Soil Survey. CoG on the soil maps in the back of the Decatur County, Indiana Soil Survey should be CnG. It seems that originally we requested that the symbol for Corydon-Rock outcrop complex, 15 to 35 percent slopes would be CoG. The map finishers went ahead and applied the CoG stick downs to those delineations on the symbols overlay before the final correlation was received. This was not caught before the maps went to the publishers. The text of the manuscript has CnG on all the tables and soil legends that refer to the Corydon-Rock outcrop complex, 15 to 35 percent slopes.

With this amendment CnG refers to CoG on the soil maps in the Decatur County, Indiana Soil Survey.

Approved: February 12, 1997
